==========

EDUCATION

University of Oregon (September 2023 - June 2027) Eugene, OR

- Clark Honors College, Bachelor of Science in Computer Science expected June 2027
- **GPA: 3.97/4.00**, Minors: Math, Entrepreneurship, and Political Science

Aurora Flight Training (July 2024 - December 2024) Aurora, OR

- Private Pilot Certificate, 74.8 TT, 38.8 PIC, PAR Score - 93%, IRA Score - 95%
- Experience in C-172N/S/SP, DA-20 aircraft, First Class Medical

==========

ATLAS AI

Co-Founder & Lead Engineer | Clark Honors College Thesis (January 2024 - Present) Eugene, OR

- Awarded $5,000 as an Oregon Innovation Challenge Fellow
- Building computer vision and machine learning systems for real-time traffic detection and enhanced situational awareness in single-pilot general aviation operations, targeting integration with live cockpit displays
- Partnering with faculty and flight simulator labs to test and validate ML models against real-world flight scenarios
- Leading a small engineering team while coordinating across UO faculty, certified flight instructors, and aviation industry advisors

==========

WORK EXPERIENCE

Oregon Blockchain Group - Software Engineer (April 2026 - Present) Eugene, OR

- Collaborate with a 12-person engineering team building blockchain solutions for external clients
- Led development of TrustLedger, a trustless escrow and decentralized arbitration protocol (see Projects)

Sower Creative - Freelance Web Developer (May 2026 - Present) Eugene, OR

- Develop and deploy production websites for local SMBs as the technical lead of a 3-person marketing agency, handling everything from custom HTML/CSS/JS builds to SEO schema markup and Google Business Profile optimization
- Own end-to-end client delivery including mobile-responsive design, third-party integrations (form backends, video hosting, financing widgets), and GitHub-based deployment workflows

University of Oregon Housing - Resident Assistant (September 2025 - Present) Eugene, OR

- Provide on-call crisis response and conflict mediation as primary responding RA for Justice Bean Hall, a 650-resident community
- Coordinate with housing staff and campus resources to manage behavioral incidents and student welfare

University of Oregon - Computer Science Learning Assistant (September 2024 - April 2025) Eugene, OR

- Mentored students in core CS concepts through debugging support and guided problem solving
- Collaborated with faculty on lesson planning and course structure improvements

Finlandia Sauna - Manufacturing Technician (June 2024 - December 2024) Tigard, OR

- Assembled and wired electrical control panels for custom sauna units, including component layout, connection routing, and system-level QA

==========

PROJECTS

TrustLedger - Decentralized Escrow & Arbitration Protocol Git Repo, Webpage

- Co-built a trustless escrow protocol on Arbitrum using Solidity, Foundry, and HardHat with on-chain arbitration via Chainlink VRF, staked juror committees, slashing, and a 72-hour appeal mechanism
- Designed a hybrid IPFS/on-chain storage model with tamper-evident document hashing and linear partial-completion payouts

Market Confidence Analyzer - 3rd Place Winner, 45 Teams (QuackHacks 2) Git Repo

- Built a real-time market confidence scoring system (0-100), in a 24-hour 2-person hackathon
- Merged stock, crypto, housing, bonds, Polymarket data using FastAPI and streamlined HTML/JS interface

==========

SKILLS

- Languages: C, C++, Python, Solidity, TypeScript/JavaScript, SQL, HTML/CSS
- Frameworks & Tools: Git, Foundry, HardHat, FastAPI, Node.js, Linux/Unix, Vim, Netlify, Vercel, Claude Code, Codex
- Areas: Data Structures & Algorithms, Smart Contract Development, Applied Machine Learning
